Diksha Deware

Fullstack Developer | Open Source Contributor
dikshadeware@gmail.com | LinkedIn | GitHub | Portfolio | X | +91 8999833245 | Mumbai, India

SUMMARY

Full-stack developer (MERN) with a focus on learning designing. Contributed 20+ pull requests to production codebases and completed an internship at Welldone Health. Skilled at turning complex concepts into clear, structured content and building interactive digital products from concept to deployment. Fast learner with a learner-centered mindset, ready to create engaging, outcome-driven training.

EXPERIENCE

Welldone Health *Remote | May 2026 - Sep 2026*
Software Developer Intern

- Building and shipping features in a production React and Node.js codebase; involved in code reviews and bug fixes across the full stack.

AboutCode | Scancode Toolkit and Scancode.io *March 2026*
Open Source Contributor GitHub (Toolkit) · GitHub (Scancode.io)

- Raised 10+ PRs into Scancode Toolkit, a widely used tool for license and copyright detection. Improvements covered license rule accuracy, false-positive reduction, and detection quality across real-world codebases.

HiperHealth *March 2026*
Open Source Contributor GitHub (Core) · GitHub (Web)

- Contributed PRs and filed reproducible bug reports to improve features, UI flows, and overall functionality across the core and web platforms.

EDUCATION

Vasantdada Patil College of Engineering, Mumbai *Aug 2023 - 2027*
Bachelor of Technology in Computer Engineering | CGPA: 8.61

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java,
Databases: MongoDB, Firebase (Firestore), MySQL, Supabase
Frontend: React.js, Next.js, Tailwind CSS
Backend: Node.js, Express.js, REST APIs
Tools: Git, GitHub, Figma, Dribble, Framer Motion

PROJECTS

Orbit Work | Next.js, TypeScript, Supabase, Hono, Tailwind · In Progress Live · GitHub

- Building a team management platform with workspaces, projects, tasks (Kanban, table and calendar views) and sprints. Designed a configurable role-based access system where admins create custom roles and set permissions, with a deny-by-default model enforced in the API and the database (Postgres Row Level Security).
- Implemented an access-request workflow (locked actions send a request to admins for one-time, timed or permanent approval), role-bound invite links, and a permission audit trail. Currently working on use cases for team chat and will expand it for work-from-home teams (attendance, time tracking, workload).

HireBuddy | React.js, Node.js, Express.js, Firebase Live · GitHub

- Hiring platform for recruiters to track applicants and run aptitude and technical tests. Reduced manual evaluation steps, improving recruitment efficiency by ~40%.
- Firebase for auth and real-time data, role-based access for HR vs student views, deployed on Vercel. Handles real concurrent users without issues.

FluxQ | React, Node.js, Express.js, MongoDB NPM · Live · GitHub

- Patient triage system that prioritizes by urgency and wait time. Custom priority algorithm with dynamic aging prevents queue starvation. Core engine published as an NPM package (fluxq-engine).
- REST API with a real-time dashboard for live wait-time estimates and doctor utilization tracking.
